

INDEPENDENT SOFTWARE TESTING

At Stonemill Consulting, independent software testing is all we do. And we are good at it. We hire top people with technical backgrounds and years of experience who love to test. So, whatever testing needs you have, we can help. Whether it is for help with test execution, or a complete Software Quality Assurance managed services approach, start by calling us today. We'd love to talk!

CONSULTING

FOCUSED ON TESTING

We are interested in one thing only: to find as many defects as possible before you release into production. We are focused and motivated!

TESTED BY DEVELOPERS

We hire programmers because they make better testers. They provide your developers with what they need to fix the problem the first time.

FLEXIBLE AND "ON DEMAND"

Our staffing model flexes with your software testing needs; assembling a team for short bursts of testing, or supporting a long-term staffing model. When you need us, we are there. When you don't, we are standing by.

STONEMILL

CONSULTING

IS IT TIME TO OUTSOURCE YOUR TESTING?

Are your customers finding defects for you?

Are they complaining about the system's quality?

Are your developers testing their own software?

Do you run out of time before you have to release?

Are you skipping tests because you don't have time?

Do you often release without a full regression test?

Are you expecting a huge surge in users?

Would you lose business if your site went down?
